Need a Summer Internship?

Interested in Undergraduate Research?

Considering Graduate School?

Want hands-on experience?

Then this may be the internship for you...

The Virginia Nursery & Landscape Association
Urban Horticulture Center Research Internship

Applications are now being accepted for summer 2010

Internship Description: This is a paid part-time internship (if you need a full-time internship, do not be discouraged, this can be combined with other job opportunities at the Urban Horticulture Center). The intern will be mentored by a faculty member on a research project that takes place at the Urban Horticulture Center, a field and greenhouse research facility of the Horticulture Department. Collaboration on a poster or presentation at the end of the internship is expected. Undergraduate Research Credit may be arranged with the mentoring faculty member. The intern will spend approximately half their time working on their research project and half their time on a rotation assisting with existing research at the UHC. The internship pays $10 per hour for 120 hours during the summer (i.e. 10-15 hours per week for 8 to 12 weeks). Additional funding is available for project supplies. It is ideal for a student attending summer school in Blacksburg.

Qualifications:
Graduating in 2010, 2011 or 2012
A minimum 3.0 GPA
Preference given to Horticulture majors and Horticulture minors
Self-starter

When to Apply: Now! but the deadline is March 19

How to Apply: Please send your resume and an email describing your availability and interests to: Dr. Susan D. Day, Director Urban Horticulture Center at sdd@vt.edu

The successful applicant will be matched with a faculty member mentor. (Ask your favorite faculty member to be your mentor!).
