

Container Gardening: Pots of Many Colors – A Rainbow Garden

There are so many beautiful annual flowers that can be grown in containers outside. **Look** in a seed catalog or go to a garden center and **choose** plants to **grow** in your containers that bear flowers of every color of the rainbow...red, orange, yellow, blue, and violet. Even green flowers such as "Envy" Zinnia are now available, however, since it is hard to find "green" flowers, you might want to let the leaves fill that spot! You can start your flowers from seed or buy small plants from a nursery. **Take care** of these plants, and your "rainbow garden" will bring you enjoyment all summer long.

List what flowers you are growing for each color:

Red: _____

Orange: _____

Yellow: _____

Blue: _____

Violet: _____

Green: _____
