

Fun with Plants: Create a Plant

- **Draw** a large plant on poster board (18-24 inches tall). Your plant should include a flower, leaves, stems, roots, seeds, and some fruit.
- **Collect** some old garden magazines or seed catalogues, and **cut** out pictures of vegetables. Make a picture by gluing all the leaf vegetables, like lettuce and spinach, on the leaves of the plant that you drew.
- **Glue** all the stem vegetables on the stem of the drawing, all the root vegetables on the roots, all the fruit vegetables on the fruits, the flower vegetables on the flowers, and the seed vegetables on the seeds.
- Present your poster to your class, family, or 4-H club so they can also learn about the plant parts that they eat! **Hang** your poster up on your wall!
