

**Fun with Plants: Can You Find?**

Find a place where many plants are growing such as in your yard, at a park, in a greenhouse, or around your school. Look at some of the plants. Can you see any of the plant parts listed below? Draw a picture or press the plant parts in a heavy book or plant press. Mount your pressed and dried plant parts on paper to start a collection. Label each plant part. Ask your teacher, Extension Agent, or Master Gardener volunteer to help you find out the name of the plant that the plant part came from. Include the plant names in your collection and write the name below:

A parallel-veined leaf _____	A yellow flower _____
A seed that floats on the air _____	A long, slender leaf _____
A leaf you can eat _____	A flower with five petals _____
A seed in a pod _____	A red leaf _____
Grass gone to seed _____	A seed carried by animals _____
A purple flower _____	A seed with a hard seed coat _____
A leaf (needle) from an evergreen tree _____	A net-veined leaf _____
