

## Growing Fruit: Different Types of Fruit

There are three main types of fruit:

**Simple Fruit**

(fruit from a flower with one ovary)

**Aggregate Fruit**

(fruit from a single flower with many ovaries)

**Multiple Fruit**

(fruit from a tight bunch of many flowers, but each flower has only one ovary.)

The most common types of fruits are the simple fruits. Simple fruits can look very different from each other. They can be fleshy, like an apple, or dry, like a peanut.
