

Growing Seeds Indoors: Interview a Seed

What would you like to ask a seed as it grows into a seedling? Wouldn't you like to know how it feels to push roots into soil? Or, what is a seedling's favorite insect? Or, what is the hardest or easiest thing a seedling has to do? Use your imagination and write an interview with a growing seed, including how you think it would answer your questions. Share your interview with your group. Be creative!
