

Growing Seeds Indoors: Try it on for Size

Plants come from seeds that range in size from the tiny mustard seed to the huge coconut seed. Collect seeds from your garden or from the foods that you eat. Display and label the seeds from the smallest to the largest. Find or draw a picture of the plant that grows from each seed and place it next to the seed.

Which seed is the smallest? _____

Is the plant that grows from this seed the smallest plant? _____

Which seed is the largest? _____

Is the plant that grows from this seed the largest plant? _____

What does this say about seeds and the plants that grow from them? _____
