**GETTING STARTED**

Look for opportunities at these garden centers and other collection sites for specific drop-off programs throughout the growing season. For this to work most efficiently please do the following with your waste nursery containers:

- Separate the plastics according to the type of plastic.
- Knock out all loose dirt.
- Remove all metal wire from hanging planters.
- Nest the pots or trays together as tightly as possible.
- At the garden center, stack your pots with those of the same resin code. (Someone at your local garden center will likely help you with this step.)

**Group containers by the resin code on the bottom of the pot.** The primary plastics used for garden and nursery containers bear the following symbols: #2 for high density polyethylene (HDPE), #5 for polypropylene (PP) and #6 for polystyrene (PS).

---

Virginia Cooperative Extension, the Virginia Green Industry Council, and the Virginia Master Gardener Association are working together to promote and implement this new program. You can also help by identifying other local independent garden centers and encouraging them to participate in this program in the future. Direct them to Dr. Joyce Latimer at 540-231-5451.

You can also contact your local Extension Office with further questions or needs for assistance. Find your local office at: http://www.ext.vt.edu/offices/

**PLASTIC NURSERY POT RECYCLING**

Learn how you can recycle your plastic nursery pots and where you can recycle them!

**Collecting pots statewide in 2012**

Virginia Cooperative Extension program and employment are open to all, regardless of race, color, national origin, sex, religious, age, disability, political beliefs, sexual orientation, marital or family status. An equal opportunity/affirmative action employer. Issued in furtherance of Cooperative Extension work, Virginia Polytechnic Institute and State University, Virginia State University, and the U.S. Department of Agriculture cooperating. Alan L. Grant, Dean, College of Agriculture and Life Sciences, and Interim Director, Virginia Cooperative Extension, Virginia Tech, Blacksburg. Wood Menu, Interim Administrator, 1800 Extension Program, Virginia State, Petersburg.
Thank you for partnering with your local independent garden center to recycle plastic nursery pots and containers. We have surveyed most of the recycling centers in Virginia and have found very few that collect garden pots. However, much of this plastic can be recycled into new garden and nursery containers or other plastic items. We just need to collect it! With your assistance we can start reducing the amount of garden and nursery pot plastics that goes to the landfill.

What will recycled pots become?

In addition to new garden containers, bottles for non-food items such as shampoo, conditioner, plastic lumber for outdoor decking, pipe, floor tiles, automobile applications such as battery cases and signal lights, brooms and brushes, garden rakes, storage bins, thermal insulation, cameras, desk trays, egg shell cartons, plastic moldings, and more!

In 2010, the Richmond pilot project collected nearly 4 tons of garden containers. We collected a similar amount of plastic in 2011. So, join us in a statewide initiative to redirect plastic garden and nursery containers and pots from landfills to recycling facilities. Most of our collected pots will be used to create new nursery products. See the resin code on the bottom of the pot. All plastics with the same code can be grouped together, regardless of pot size, color or style. Miscellaneous nursery plastics that are not identifiable can be co-mingled and recycled separate from the numbered plastics. So, bring all your garden pots to the garden center.

STATEWIDE in 2012

PARTICIPATING GARDEN CENTERS

For more information and an up-to-date list of participating garden centers where you can recycle your garden containers, visit: http://hort.vt.edu/VA GardenersRecycle/
